PROFESSIONAL SUMMARY

Recent graduate in B.Tech Electronics and Communication Engineering with a strong foundation in circuit design, and signal processing. Possesses a solid foundation in programming in Python, with a strong interest in leveraging technology to develop efficient, data-driven web solutions that address real-world challenges. Seeking an opportunity to contribute to innovative projects, enhance practical experience, and develop expertise.

TECHNICAL SKILLS

- Embedded Systems: Arduino, ESP32, Sensor Interfacing, Circuit Design, IoT Electronics: Circuit Design, PCB Basics, Testing & Measurement
- Programming Languages: Python, Basics of Java
- MS Office: Word, PowerPoint, Power BI, Excel
- Basics of CAD/CAM & engineering simulations
- Production & Quality Concepts: 5S, Root Cause Analysis, Problem Solving, Safety & Compliance.

SOFT SKILLS

- Analytical Thinking, Communication, Team Collaboration, Adaptability, Continuous Learning, Problem solving

EDUCATION

Diploma in Bio-Medical Engineering	September 2020 - July 2022
EK Nayanar Memorial Model Polytechnic College, Kallyassery, KANNUR	CGPA :8.1/10
Bachelor of Technology in Electronics and communication	October 2022 – May 2025
College of Engineering Trikaripur, APJ Abdul Kalam Technological University, Kerala	CGPA :6.84/10

PROJECTS

- | | |
|--|--|
| Gesture Recognition based Human-Computer Interface |  June 2024 – May 2025 |
| <i>Tech Stack:</i> Python, OpenCV, MediaPipe | |
| <ul style="list-style-type: none">• Built a hand gesture-controlled interface using Python, MediaPipe, and OpenCV in Visual Studio Code.• Implemented hand landmark detection to map gestures (click, scroll, drag) to mouse functions, designing a real-time, contactless HCI system that improves accessibility and enables intuitive, touch-free computer interaction. | |
| IoT based Water Quality Monitoring System | June 2023 – May 2024 |
| <i>Tech Stack:</i> Arduino, IoT Sensors | |
| <ul style="list-style-type: none">• Built an Arduino-based IoT system to monitor pH, turbidity, and temperature in real time using water quality sensors.• Transmitted sensor data to a mobile platform for remote monitoring and analysis. | |

INTERNSHIPS

- | | |
|---|---------------------------|
| Machine learning, WAYEVA innovations | January 2025 – March 2025 |
| <ul style="list-style-type: none">• Built and trained ML models for data analysis and predictive insights using Python libraries.• Performed data preprocessing and visualization to improve model accuracy and support decision-making. | |
| Arduino and IoT , Reverttech IT Solutions | May 2023 – June 2023 |
| <ul style="list-style-type: none">• Learned the basics of Arduino and IoT and how sensors and devices communicate.• Worked on simple IoT projects involving data collection and automation using Arduino. | |

TRAINING & CERTIFICATIONS

- Python Full Stack Development : PySpiders, Bengaluru
- Certified in Career Essentials in Generative AI by Microsoft and LinkedIn
